SUMMARY

Full-stack engineer with a B.S. in Computer Science, building web apps and backend services in React, Next.js, TypeScript, Python, and Go. Lead contract developer for a WooCommerce e-commerce business, owning the storefront, third-party API integrations, and a Go payout service backed by 299 automated tests. Deploys on AWS with Docker and CI/CD, from database design through production.

TECHNICAL SKILLS

Languages: Python, Go, TypeScript, JavaScript, PHP, SQL, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, WordPress/WooCommerce, Payload CMS (headless)

Backend: FastAPI, Django, Node.js, Express, REST APIs, WebSockets, GraphQL

Cloud and DevOps: AWS (Lambda, API Gateway, DynamoDB, S3, Step Functions, Bedrock), Docker, Terraform, Git, GitHub Actions, CI/CD

Databases: PostgreSQL, MySQL, DynamoDB, Redis, MongoDB

Testing and AI: Pytest, Jest, Vitest, Go testing, security testing, Anthropic Claude API, AWS Bedrock, ElevenLabs API

WORK EXPERIENCE

AI Systems Consultant | House of Helix LLC | Los Angeles, CA Aug 2026 - Present

- Design and build AI systems for the company, including LLM-backed agents, prompt and workflow engineering, and internal AI tools that plug into existing business software.
- Build API, database, and CRM integrations that automate lead management, communications, and reporting, owning server configuration, deployment, testing, and documentation.
- Building a server-rendered Next.js wholesale storefront for Smoke Show Labs where licensed cannabis operators price white-label vape products, with volume discounts computed server-side so pricing never reaches the browser.
- Wrote a Zod-validated domain layer over typed fixture repositories so the UI can ship ahead of the backend, with CI lint, type, test, and security checks and a staged release workflow with health checks and rollback.

Full-Stack Developer (Contract) | Advanced Sequence | Los Angeles, CA Aug 2026 - Present

- Lead developer for a WooCommerce e-commerce store (WordPress, PHP, JavaScript), owning theme development, checkout and caching fixes, and site-wide SEO and structured data.
- Built a Go affiliate attribution and payout service backed by 299 automated tests, with a paginated third-party API client, reversal and ledger logic, Postmark transactional email, and a durable nightly payout queue.
- Integrated affiliate tracking, AI support chat, and email marketing services, documenting the caching and redirect edge cases that silently break data flow.
- Improved Core Web Vitals by rewriting theme JS and CSS; built a custom mu-plugin for QR redirects with server-side scan counting.

Full-Stack Development Intern | Cabana Joes Hospitality Products | South Gate, CA Apr 2022 - Aug 2022

- Built an e-commerce platform with 20+ reusable React components and full test coverage, and improved database query speed through indexing and caching.

PROJECTS

Real-Time Chat Analytics Platform | *Go, WebSockets, DynamoDB, React, TypeScript, Docker, AWS, ElevenLabs API*

- Built a Go WebSocket chat server with a live React dashboard reporting message volume, active users, and response times.
- Added ElevenLabs text-to-speech voice alerts for unusual traffic, with content-hash audio caching and a text fallback when the monthly budget runs out.

SugarMenu (in progress) | *Next.js 16, React 19, TypeScript, Node test runner*

- Building a lifestyle editorial publication with App Router routes for the home page, seven category fronts, and articles, served from a typed async content repository ready for a CMS adapter.
- Added brand design tokens with self-hosted fonts, per-route metadata, real 404s, a health endpoint, and smoke tests that hit every route on a production build.

AgentFlow | *Python, FastAPI, Docker, Anthropic Claude API, AWS Bedrock*

- Built a Dockerized Python FastAPI service that runs multi-step AI workflows through the Claude and AWS Bedrock APIs, covered by 69 automated tests.

EDUCATION

B.S. Computer Science, California State University, Fullerton Jan 2026

Full-Stack Web Development Certificate, UCLA Extension Aug 2022
